DOUKHOBORS ARE NOT WANTED IN FRUIT BELT

Will the rumored invasion of the Doukhobors into the Fruit Belt come to pass? It is hoped that it will not. One thing in connection with their contemplated trek to this district that they have probably overlooked is the fact that the residents of the district from Hamilton to the Niagara River between Lake Ontario and Lake Erie will fight their settling in this section tooth and nail. If the Douks imagine that they are going to be received in the Peninsula with open arms they are sadly mistaken, for rather will they be received with clubs.

Some time ago a large colony left Saskatchewan and settled in the berry-growing sections of British Columbia much to disgust and chagrin of the people living in those sections. That they were not welcomed was evidenced from the start and during their residence there they have not in any way given the people cause to change their attitude toward them, but rather the reverse has taken place. Press despatches from the coast state that the Douks have been, and still are, openly defying the laws of the province, so much so that the Attorney-General of British Columbia has taken action to make them live up to the laws of the province or get out.

The Douk is without a doubt a thrifty person in his or her own way, but it is not the kind of thrift that helps build up a district or a country but rather is the thrift that ruins a country. In other words, they are hard workers and money makers, but terribly miserly. They do not take kindly to modern methods, except in rare cases, but live and work more or less after the style that prevailed in their own country in Caucasia hundreds of years ago. Laws and customs of a country mean nothing to the Douk and the idea of progress is a bugbear to him.

If by some chance the tribe does settle in the Fruit Belt it means ruin to the section they plant themselves in and to the surrounding districts for miles. It is up to every newspaper and every fruit grower and all residents of Lincoln and Wentworth to fight this invasion with all their moral, financial and political powers and thus keep the Niagara Peninsula the veritable garden that it is, populated by a high-class of educated people who are respecters of the law, protectors of the flag and whose morals are beyond reproach. The Fruit Belt has no place or room for the Doukhobor, so he best stay where he is.

In this connection we print an article from "The Spotlight" in The Toronto Daily Star, of June 20th, which is well worth reading:

Peter Verigin, of Verigin, announces that the Doukhobors who remain in Saskatchewan, after the trek of most of the tribe to British Columbia, propose to buy fruit farms in the Niagara Peninsula, and he and his aide are coming east to see what the dealing is like. "We may have a very serious invasion," because there is a prejudiced remembrance of certain Doukhobor actions in the past.

Verigin's garb. Talk with a Doukhobor about this—not one of the naturists—and he asks if a whole community should be ostracized because of a few extremists. He also asks, if no social crimes are committed by other folks, and if a people should not be judged on its general record and not on its abnormalities. The Doukhobor is no fool, even though he practices a form of the belief in the community of goods which is preached in the British Commons and which was practiced in part, at least by the early church, which is the dear, but distant model of some most conservative theologians.

Peter Verigin is apparently still the chief of the Christian Brotherhood, the name which these Russian semi-Quakers give themselves. One recalls an interview with him, when he didn't look at all as the present-day published pictures of him. He was in the prime of life, much resembling Conal Doyal, and of a quietude of speech which one has noticed in many men who do "old things."

A few days before Verigin, a high official in the immigration department had predicted that within a month he would be nailed and smug of his followers would be on the way to Russia—a foolish prophecy, such as high officials sometimes indulge themselves with.

It was said that Peter, the head of the Christian Brotherhood, was not heeding the Pauline dictum about a bishop being the husband of one wife. In the village where he was visited, with the help of an interpreter who had to be found in Yorkton, forty miles away, there were indications that this suggestion might be something more. At all events the visitor did not enter his own house, but in one of the ordinary guest-houses of Troubitza (name imperfectly remembered).

The Doukhobor future in Canada, one had sensed, was peculiarly contingent on what happened to the women. The form of authority wielded by Verigin was not easily discoverable. A railway contractor, looking for "men and teams, dealt with him exclusively. His leadership seemed to be unquestioned. His attitude to the development of the Doukhobor women was, and no doubt is, an important factor in the evolution of the people who have brought to maturity their native-born Canadians.

Observers, usually persons who never saw a Doukhobor village, have prophesied that it will take two or

INCREASED STAFF AT VINELAND

Mr. J. A. Neilson, B.S.A., M.S., until recently lecturer in Horticulture at the O.A.C., has been appointed to the Vineland Horticultural Experiment Station Staff in the capacity of Extension Horticulturist. Mr. Neilson is a man of wide horticultural knowledge and experience and is more than ordinarily well fitted to carry out his duties along Extension lines. He is at the service of all fruit and vegetable growers to visit them at any time, or to advise by letter or telephone on cultural problems. If you are interested in fruit thinning, or have difficulties in pruning, spraying, cultivating, etc., Mr. Neilson is here to assist and generally to carry the work of the Experiment Station to you.

Game Amateur Radio Operator Battles For Three Hours Against the Elements in Order That People Could Get News of the Elections.

With telephone and telegraph wires blown to the ground in all directions and with the storm king venting his fury spasmodically upon eastern, western and south-western Ontario, newspapermen all over the province on Monday night were driven to desperation in order to secure election results for the great mass of voters that were eagerly clamoring for them at all points.

In Grimsby the returns from the town and township were received at The Independent before seven o'clock, but was after eleven o'clock before the final figures were received from the south townships and then they were not authentic, but so much, as to assure the citizens that Kemp was elected.

Shortly after seven o'clock Steve Bradley notified The Independent that all telegraph wires between Toronto and Hamilton and at other points in the province were down and that the special election wire installed in Moore's theatre would be out of business practically all night. The Independent was up against it for fair, for had it not only to get the people below the mountain through in some manner or form, but it also had to keep good its promise to give the election results to the people of Smithville and surrounding country.

The wonderland theatre in Smithville was full of people all eagerly awaiting for the news to come in over The Independent's special wire. The Independent sent out an S. O. S. call for the Rexall Club and "Jimmy" Farrell, "Sammy" Bonham and "Stoney" Kid answered the call on the double. A three-minute consultation and "Bobby" Farrell was appealed to, with the result that before eight o'clock the returns were dribbling in over "Bobby's" radio set.

The storm was raging in different points of Ontario and broadcasting from the Toronto Star radio station was done with difficulty, but Farrell was able to pick up with his set ninety per cent. of the results sent out. All the time he was working at his instruments, the blue flames and red fire were shooting out of the receivers and instruments at all corners, but "Bobby" knowing that The Independent was in trouble and that the reputation of Lincoln's Leading Weekly was at stake, stuck gamely to his task, fought the fire and elements to a standstill, and by eleven o'clock both Grimsby and Smithville residents knew that the Conservatives had swept the country. To "Bobby" Farrell and his "stick-to-it-ive-ness" must go the people's thanks for the news they received Monday night.

As fast as Bonham called the results, as he received them, they were copied by "Jimmy" Farrell and rushed by automobile to The Independent office by "Stoney" Kid and Leo Hand, where they were announced to the great crowd that thronged the editorial rooms and business offices, then they were announced from the stage in Moore's theatre and also telephoned to Smithville.

MUST HURRY UP WITH ROAD WORK

Unless Contractor Robertson Shows Enough Progress by End of This Week, to Assure the Completion of Beamsville Street by Aug. 1st, Contract Will be Cancelled.

Residents of St. David's have petitioned to the County Council to have their village made into a police village. The petition, signed by P. G. Saxton and 99 others, claims to represent the majority of the landowners in the municipality. The Council decided to consider the question on August 21st.

Various grants were recommended in the report of the Agricultural committee, adopted as follows:

That a grant of \$150.00 be granted to each of the following societies, providing they hold exhibitions: Peninsula Central, Monck, Abingdon, Niagara, Clinton and Louth Agricultural Societies.

That \$25.00 be granted to say Township Flowering Association providing they hold matches in their respective townships. Also \$50.00 to the Junior Home Flowering Association, and \$50.00 to the Lincoln County Flowering Association.

That \$250.00 be made to the County Board of Agriculture.

That \$50.00 be granted to the Lincoln Women's Institute.

That \$50.00 be made to the Niagara Peninsula Fruit Growers' Association, also to the Beamsville Horticultural Society, and to the Grimsby Horticultural Society, and \$150.00 to the St. Catharines Horticultural Society, this amount to be used in supplementing the prize list for their annual exhibitions.

That \$50.00 be granted to each of the following Poultry Shows, providing they hold exhibitions: St. Catharines and Beamsville Societies.

That a bonus grant of \$125.00 be made to Miss Thompson, stenographer in the office of the district representative for Agriculture.

Port Davidson Bridge The Road Committee recommended the acceptance of an agreement with Welland County for the rebuilding of the Port Davidson bridge. Under this agreement Welland County erects the bridge and Lincoln pays one-half the cost.

The committee also recommended:

That Councillors Gregory, Honsberger, Strong, with Solicitor Monquies, be a committee to meet a committee from Welland County Council regarding the town line between Louth and Pelham Townships.

That the roadway across Government property in Port Dalhousie be not maintained by this County.

That both sides of Main Street in Port Dalhousie be paved.

That the Road Superintendent notify Mr. Peter Robertson that unless progress is made within the next ten days to show that the work will be completed before August 1st, the contract will be cancelled and new arrangements made for its completion.

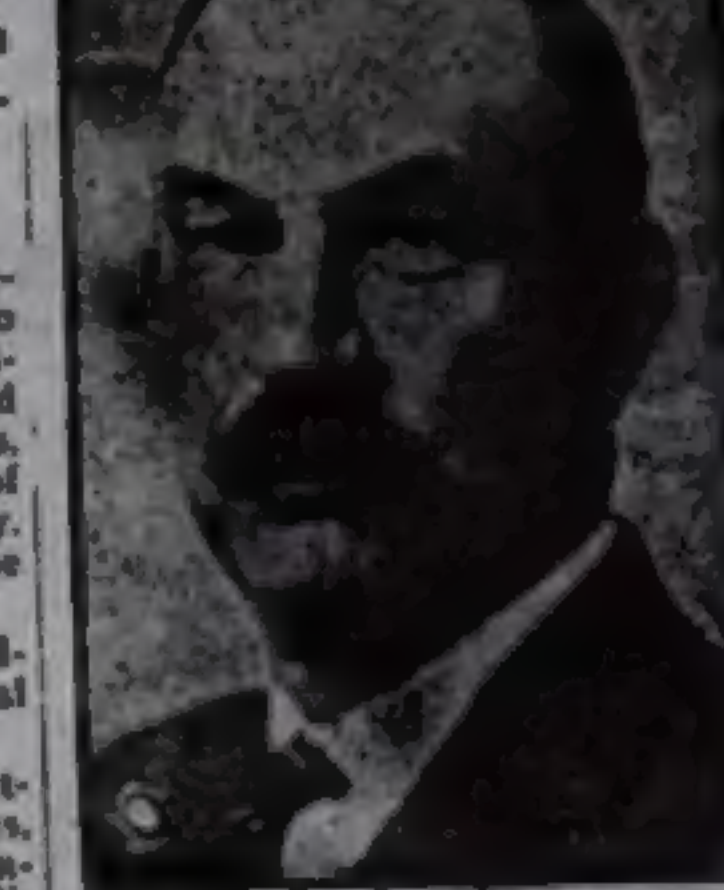

That the application of the H. G. & B. Railway for Spur crossing on Livingston Avenue, Grimsby, be referred to a committee, consisting of Messrs. Stewart, Theal, Mitchell, Richardson, Masters, and the County Engineer, with power to act.

Education The Committee on Education recommended: That a grant of \$985.24 equivalent to the Legislative Grant for equipment and accommodation for rural schools of the County be made.

That a supplementary grant of \$100.00 be made for the same purpose.

(Continued on Page Five)

One of the biggest surprises of the whole election on Monday was the defeat of Thomas Marshall, ex-M.P.P. by Robert H. Kemp, U.F.O. While most of the electors looked for the result to be close and some even predicted right up to the last that Allan would be elected, none outside of a few of the organizers in the U.F.O. party had any idea that Kemp would be elected.

ROBERT H. KEMP
Member-elect for Lincoln

Over the whole county the vote was small, hardly more than half the total number of voters on the lists using their franchise. In the towns and villages the vote was exceptionally small. The big vote being polled in the rural divisions. In Grimsby, however, there was less than fifty per cent. of the vote polled here, and as was to be expected, Allan secured a majority of 117.

In 1919, with less voters on the list, Grimsby polled 798 votes as against only 752 on Monday. In North Grimsby, in 1919, 811 votes were polled and on Monday this was increased to 836. Allan had a majority in divisions one and two in the township and Kemp a majority in divisions three and four.

Beamsville gave Marshall a majority 32, while Clinton township rolled up a majority of 150 for Kemp. Louth still remained solid U.F.O. by giving Kemp a majority of 104, although in 1919 Kline, the U.F.O. candidate, received a majority of 262 in this township. South Grimsby a purely farming community, gave Marshall a majority 39. Pelham remained loyal to Marshall and he secured a majority of 45 in that township, but it was nine votes less than in last election. Fonthill village also gave Marshall a majority.

In Gainsboro Kemp got a majority of 103, while in Caistor he came out on top by 85.

Throughout the province the Conservatives swept everything before them. The U.F.O. was practically wiped out of existence.

YES, THE ELECTIONS ARE OVER

Peace reigns again in the post office. The well-known bench without the grocery store is depopulated. Long were the well-known horseboys left to rust neglected in the scooped-out pits before the blacksmith shop. Once more they clang musically about the sore-tired legs. The elections are over. False prophets, who misinterpreted the omens, bide discreetly at home and avoid the teeming mart. Divested of the mantle of Apollo, the village oracle seeks little Johnnie for the mail and finds himself inconspicuous about the house. All were hushed lately when he held forth within the choice circle of the barber shop—now, none so ignorant of timber lore to do him reverence. For the elections are over.

Parson whistles as he sets about preparing next Sunday's sermon. For some time past he has been obliged to step circumspectly. Three Tories withdrew their contributions to his stipend because of that sermon on the "burning bush." Half the farmers stayed away after his dissertation upon the last feast of Belshazzar. Gone is the fear of treading upon sensitive political toes. The elections are over.

Already the blazoned paper of serenating campaign placards begins to appear up and flap in the lazy breeze. Over the red letters of triumphant and defeated candidates' names alike a stout lad plies the pastebrush. Anon appear the storied merits of "Barker's Baltic Balm." The elections are over. There is a flutter of pleasurable anticipation along High Street tonight. They do say that "Come-again" Chapman will roll a peanut with his nose from the Methodist church steps to the grist-mill. Jim Murray is lubricating the gear of his wheelbarrow with sewing machine oil before taking the new doctor for a little ride. How was Jim to know? And the elections are over.

NOTICE

Notice is hereby given that, by the provisions of by-law number 351, duly passed by the Municipal Council of the Corporation of Grimsby, on the 22nd day of June, 1933, rates, taxes and assessments levied by the Town of Grimsby shall be payable as follows:

(a) Rates levied for school purposes and debenture rates shall be payable on or before the 15th day of July in each year.

(b) All other rates and taxes shall be payable on or before the 15th day of December, in each year.

AND TAKE NOTICE FURTHER that the rates for 1933 for school purposes are 14 1/2 mills and for the debenture rate is 2 mills in the dollar.

DATED at Grimsby, this 23rd day of June, 1933.

W. F. RANDALL,
Clerk, Town of Grimsby

BY-LAW No. 550
of the Town of
Grimsby

Being a by-law of the Municipal Corporation of the Town of Grimsby, authorizing the issue of debentures for the sum of \$40,000, for the construction and improvements of the existing water works system in the said Town of Grimsby.

WHEREAS the Municipal Corporation of the Town of Grimsby has heretofore constructed a general water works system at the expense of the Corporation at large;

AND WHEREAS it has become necessary to extend and improve the said water works system by the construction of a 100-foot extension to the present intake, by the construction of a 27 feet by 14 feet addition to the pump house by the construction of a four-inch C. I. water main on Main Street from Mountain Street to the pump house, by the construction of a 10-inch C. I. water main on Elizabeth Street from the pump house on Main Street, by the extension of water mains on Livingston Avenue from Main Street and Patton Street to Korman Avenue, and on Korman Avenue to Main Street from Livingston Avenue, by the construction of water main on Nelles Avenue from Main Street to Livingston Avenue, by the installation of a gasoline driven pump, by the alteration of present pump-house building, and by the construction of a new filtration system, plans of which said extensions and improvements have been duly submitted to and approved by the Provincial Board of Health by Certificate bearing date the 7th day of September, 1932, the 23rd day of October, 1932, the 31st day of October, 1932, and the 1st day of February, 1933, respectively;

AND WHEREAS it will be necessary to borrow on the credit of the said Municipal Corporation at large the sum of \$40,000 to pay for the construction of said extensions and improvements;

AND WHEREAS the Municipal Corporation of the Town of Grimsby does not intend to borrow the sum of \$40,000 on the credit of the said Municipal Corporation by the issue of debentures to pay for construction of said extensions and improvements, which said sum of \$40,000 is the amount of the debt intended to be created by this by-law;

AND WHEREAS the whole amount of the whole rateable property of the Municipality, according to the last revised assessment roll is the sum of \$1,347,204;

AND WHEREAS the amount of the existing debenture debt of the said Municipality exclusive of local improvement debts secured by special rates or assessments is \$142,867.11, and no part of the principal or interest of said debentures debt is in arrears;

AND WHEREAS it is desirable to make the principal of the said debentures payable in yearly installments, and to pay the interest on the said debentures as follows:

1. That the principal and interest to be paid shall be equal as nearly as may be the amounts so payable for principal and interest in each of the other years.

AND WHEREAS it will require the sum of \$817.77 to be raised annually for a period of fifteen years to pay the annual installments of principal and interest as the same become due.

THHEREFORE the Municipal Council of the Municipality of Grimsby enacts as follows:

1. That it shall be lawful for the Mayor of the Town of Grimsby to cause to be raised in way of loan from any person or persons, body or bodies corporate who may be willing to advance the same upon the credit of the debentures hereinafter mentioned, a sum of money not exceeding on the whole \$40,000, and cause the same to be paid into the hands of the Treasurer of the said Town of Grimsby for the purpose aforesaid, and the said debentures shall be issued therefor in sums of not less than \$100.00 each bearing interest at the rate of six per cent. per annum and having interest coupons attached for the payment of the interest due thereupon.

2. That the said debentures shall all bear the same date and shall be issued within two years from the date of passing this by-law and may bear any date within such two years and shall be payable in fifteen annual installments during the next fifteen years after the time when the same shall be issued and the respective amounts of principal and interest payable in each of such years shall be as follows:

No.	Interest	Principal	Total
1.	\$609.00	\$207.77	\$816.77
2.	\$615.34	\$202.43	\$817.77
3.	\$621.68	\$197.09	\$818.77

39.	\$849.92	\$4.85	\$854.77
40.	\$856.26	-\$0.50	\$855.77

3. That the said debentures shall be made payable at the office of the Town Treasurer of the Town of Grimsby.

4. That the said debentures shall be signed by the Mayor and Treasurer of the said Municipal Corporation and sealed with the Corporate Seal. The interest coupons shall be signed by the Treasurer of the said Municipal Corporation whose signature may be printed, stamped, lithographed or engraved.

5. That, during the term of fifteen years, the currency of the said debentures, and for the purpose of paying said debentures and interest, the sum of \$117.77 shall be raised annually by a special rate for the said purpose in addition to all other rates and that such rate shall be assessed, levied and collected in each year on all the rateable property of the Municipality of the said Town of Grimsby. This by-law shall come into force and take effect on the day of the final passing thereof.

Passed in open Council on the 13th day of June, 1933, by an affirmative vote of three-quarters of the members of the Municipal Council of the Town of Grimsby.

C. T. FARRELL,
Mayor.

W. F. RANDALL,
Clerk.

Notice of Promul-
gation of By-law

The above is a true copy of a by-law passed by the Municipal Council of the Corporation of Grimsby, on the 22nd day of June, 1933.

And all persons are hereby required to take notice that anyone desiring to apply for a license, or to make an application for that purpose to the Supreme Court of Ontario, within three months after the first publication of this notice in the newspaper called "The Grimsby Independent", or he will be too late to be heard in that behalf.

Dated this 23rd day of June, 1933.

W. F. RANDALL,
Clerk of the Town of Grimsby

late to be heard in that behalf.
Dated this 23rd day of June, 1933.
W. F. RANDALL,
Clerk of the Town of Grimsby

Notice of Registration of
By-law

NOTICE is hereby given that a By-law was passed by the Municipal Council of the Corporation of Grimsby, on the 13th day of June, 1933, providing for the issue of debentures to the amount of \$40,000 for the purpose of extending and improving the existing water works system in the said Town of Grimsby, and that such by-law was registered in the Registry Office of the Registry Division of the County of Lincoln, on the 20th day of June, 1933, in Book "A" for registration of by-laws.

Any motion to quash or set aside the same or any part thereof, must be made within three months after the first publication of this notice and cannot be made thereafter.

Dated the 20th day of June, 1933.

W. F. RANDALL,
Clerk, Town of Grimsby.

CURRENT EVENTS
BY PETER PETERKIN

A well-known traveller reports that there is no such thing as "Jazz" in the wilds of Africa. If that statement is true the term "wild" would appear to be a misnomer.

W. J. Bryan says that wealth is a disease. Usually when W. J. B. makes a statement of any kind, he is wrong; but this particular case seems to be an exception, because I know a man who took it and was confined for three years.

Keynes, the famous economist, thinks that the idea of a huge international loan to Germany in order to settle the reparations question is entirely wrong. According to him the best that can be done to help Germany onto her feet again is to float a small half-charitable loan on the Austrian basis, and the Allies should then be content with what she can pay year by year.

The City of Middletown, Ohio, with a population of 24,000, affords an example of a case in which local transportation is entirely supplied by motor buses, there being no electric railway system. Undoubtedly this mode of transportation would seem to promise a solution of the congestion problem on narrow streets.

According to Senator Copeland of New York, it takes 63 dozen eggs to pay a New York plasterer's wage for eight hours' work, and 17 bushels of corn are required for a bricklayer's day. The painter gets the equivalent of 23 chickens and the plumber gets the equivalent of 42 pounds of butter, or the output of 14 cows. After eight months of feeding a hog, will pay a carpenter one day's wage. No wonder laborers are leaving the farms in the United States.

As I have frequently pointed out in these notes, skilled labor has succeeded in creating an artificial monopoly on this continent whereby they are enabled to gouge the public by receiving pay entirely out of proportion to their services. When a wrong of this kind is attempted by a powerful corporation, listen to the howl of labor, but if a labor organization does precisely the same thing, apparently it is all right.

These comparisons show particularly how desperately the farmers are suffering from this kind of thing, and as long as this state of affairs continues farmers and labor have no business in the same camp.

In the past the labor unions have met with a considerable amount of success in making the farmers believe that their troubles were entirely owing to the machinations of wicked capitalists, but surely the eyes of the farmers ought to be opened by such revelations as the above, to the fact that labor is far more responsible than capital for the present abnormal condition of agriculture on this continent.

Here follows a case in illustration: Western farmers have been complaining bitterly about the high prices of farm implements believing that the manufacturers were taking advantage of the tariff to gouge the farmers.

But when this question of implement prices came before the Parliamentary Committee on Agricultural Credits at Ottawa, Thos. Bradshaw, general manager of the Massey-Harris Co., submitted a schedule showing increases in commodities and implements purchased by the farmers since the outbreak of war as follows: Hardware, 86 per cent.; clothing, 76 per cent.; lumber, 79 per cent.; miscellaneous, 86 per cent.; farm implements, 64 per cent.

Mr. Bradshaw showed that plant equipment, for his company, had increased in price from \$ to 127 per cent.; labor costs, 113 per cent.; and freight charges 44 per cent., since 1913. This shows how high costs of production, largely the result of union enforced wages, are cutting deeply into profits.

Apparently some of the western farmers are beginning to realize the fact, for C. W. Peterson, in the Farm and Ranch Review, says: "In face of these figures it is not very difficult to account for a 64 per cent. increase in the price of farm implements."

And Mr. Peterson continues: "It should seem quite obvious to anyone who is mentally capable of taking an unprejudiced view of the economic situation, that those selling machinery and transportation cannot increase labor wages 113 per cent. and calmly proceed to sell machinery and transportation at the good old prices—at least, not without going broke."

"I am not attempting to argue," he said, "that urban labor is not justly entitled to a 113 per cent. increase in wages. I don't know much about it. But it first makes me weary to listen to our agricultural 'red' and 'uplift' elements, railing against 'big business' and the 'interests', and holding those mysterious and elusive influences solely responsible for present high costs, with these plain facts staring them in the face."

"No one outside our lunatic asylums, could possibly expect any other result from more than doubling the rewards to industrial labor, under the threat of general strikes. Of course, the farmer is the 'goat'. But it does make some difference whose 'goat' he is, he might as well fix the responsibility where it properly belongs."

It seems to me that an unanswerable case is made out in favor of my contention that at the present time labor is our oppressor and not the capitalist.

OFFICE DOG

The shades of night had fallen fast, Breakfast time had come at last; A plate of food before him placed, He wondered at the funny taste.

It takes sixty-four muscles of the face to make a frown and only thirteen to make a smile. Why work overtime?

The only way to save daylight is to use it.

Turn your worries into thoughts and your liabilities will become assets.

Ups and Downs

Jack sailed out one fine evening To call on a fair young miss, And when he reached her residence, this:

Ran up like the stairs

Her father met him at the door— He'll never go there any more, For

he went down like this.

In the old days a ford was the place where you crossed the river. Now it's every place you try to cross the street.

"Woman, you make me see red," said the youth, as he gazed at her rouged cheeks and painted lips.

That cafeteria man who is advertising for a slogan might try: "Heaven helps those who help themselves."

Someone has discovered that it takes 140 nuts to hold a Ford together and only one to hold it on the road.

MOTOR ACCIDENTS CAUSED BY CARELESSNESS OF MOTORISTS

In many cases, accidents to motorists at highway crossings over railways are due to the negligence of those driving cars. This negligence is to be found both at unprotected and protected crossings. The Grand Trunk lines from October, 1922, to May 9, 1933, show 54 cases where there was danger at protected crossings due to the negligence of those using the crossings. All but four of these cases were due to the carelessness of motor drivers. Notwithstanding safety devices and cautionary signals, people take chances and disregard safety. Motor accidents are becoming more frequent. Every sane mo-

More Little Trips
in Big Canada

No. 3—CHARLOTTETOWN, P.E.I.

"Way down east in Canada is the charming and characterful City of Charlottetown; tucked away on the edge of the Island province of Prince Edward. It is, moreover, a capital city in both meanings of the word, but chiefly as the legislative and legal centre of our rich and dear little 'Mill-Isle-Are-Farm'."

It may be approached by land and water, but by only one way at a time. By water, first, let it be. Soon after the shores of the picturesque Island loom up as banks of red between waters of blue and trees and fields of green, the town sorts itself into actuality in the broad-canvassed nature picture, lining the shores for a mile or more, with its feet in the water, and long and ancient wharves for boats to tie up to—marina snubbin' posts as it were. The first general glimpse reveals three tall spires, like unto those of Coventry town in the heart of England, and very tall and tapering spires they are, "fingers of stone" (if they are stone) pointing heavenward and telling of the supremacy of the spiritual over the material.

Or, you may reach the City of "Chr'n," as modernists abbreviate it on hotel registers, by the winding way of the Island railroad, after landing from the big ferry at Port Borden.

Thrift should be encouraged continuously, not intermittently. In our schools and Sunday schools, in our churches, theatres, business houses, newspapers and through every other possible medium, interesting and appropriate encouragement in thrift should be given.

Until these things are done, we shall continue to read in the newspapers from time to time of terrible financial losses sustained by those who have not yet learned that money making is a steady, methodical process, which cannot be counterfeited by the waving of a magic wand.

A LITTLE TALK ON THRIFT
(By S. W. Straus, President American Society for Thrift).

With almost regular frequency one reads in the newspapers of the heavy losses of funds sustained by large numbers of persons who have not been prudent in the administration of their personal affairs.

More and more events emphasize the greater need of thrift education. Our public losses through various varieties of fraud reach high into the hundreds of millions of dollars each year. These figures do not include those instances of losses where the victims have, with open eyes, assumed a reasonable chance of loss. The stupendous sums referred to represent only such losses as are incurred in schemes where the whole plan was nothing better than a swindling process.

While the courts eventually administer punishment to those engaged in these notorious pursuits, the only eventual remedy for the economic malady lies in education.

To begin with there should be a broader ground work of thrift taught in our public and private schools. This is a question that has been discussed by educational bodies for many years. In August, 1915, the National Education Association, while in session in Oakland, Cal., took official action. Since that time this national body of educators has considered the matter of thrift education, and in many parts of the country thrift has been included in the curriculum.

But education in thrift still lacks intensiveness.

This will bring you into the capital by the back door as it were, but what's the odds so long as you arrive—and stay a while before starting on motor car explorations of this Garden of the Gulf.

"Chr'n." will surprise its guests with all it has to offer. Right in the heart of the metropolis is an unique historical building of old structures in legislative halls, courts of justice, post office and market, huddled as neighbors should—or, wander down to the water front, of which there is a lot! There's the lure of the sea, the tang of the salt-laden air, the ancient piers and other smells of venerable fish and landing stages, together with the sturdy craft of those who go down to the sea in boats, little or big.

The same salty sea, the Strait of Northumberland, leaves the shore line of a beautiful park, where old cannons sleep on the summits of old earth-works. A stately Government House looks at you through the trees, winding paths and roads invite your patronage, and prosperous and roomy homes help to form a striking background. Impassioned colleges, schools and churches add to the architectural features of this city by the sea, "Chr'n," as modernists abbreviate it on hotel registers, by the winding way of the Island railroad, after landing from the big ferry at Port Borden.

New Article—Little Met's

Thrift should be encouraged continuously, not intermittently. In our schools and Sunday schools, in our churches, theatres, business houses, newspapers and through every other possible medium, interesting and appropriate encouragement in thrift should be given.

Until these things are done, we shall continue to read in the newspapers from time to time of terrible financial losses sustained by those who have not yet learned that money making is a steady, methodical process, which cannot be counterfeited by the waving of a magic wand.

NIAGARA IN BLOSSOM TIME

To drive thro' perfumed clouds of Glory, miles and miles, Where blossoming orchards spread their snowy arms, And all the country smiles; Where the river like a silver ribbon runs

Between the far blue hills, And the earth, new-washed in May-time splendor, The soul with rapture fills.

And when the moon shines softly down On fields of white, And midnight stars are glinting

In the ebon vault of night, It surely is the fairest land that mortal eyes ever tread;

A foretaste of the splendors of the Paradise of God!

And its beauties are eternal— (No land on earth more fair); In dreams I see its snowy fields, And breathe its perfumed air.

Stratford. —C. E. P.

\$50 per month

saved and invested in safe bonds from age 30 to 60, interest being reinvested, accumulates **\$49,772.06**

Our Partial Payment Plan for Buying Bonds is excellently fitted for such a scheme. Through it is provided the necessary incentive to carry out a systematic programme of saving a determined portion of your income each month and investing it in safe bonds. The contract into which you enter with us is just sufficiently stimulating to create and maintain the desire to continue buying high grade government, municipal and corporation bonds. The availability at all times of funds so invested is an attractive feature of this plan.

Many investors—both large and small—have found in Buying Bonds on the Partial Payment Plan the solution to many of their financial problems. We suggest that you mail the coupon below for full particulars.

SELF-OILING — SELF-REGULATING

With the Strongest Tower Built

It's the "Toronto" Self-Oiling Windmill—requiring "oil only once a year". All gears operate in a bath of special oil affected by neither heat nor cold—every bearing and working part thoroughly and automatically lubricated.

If you have a "Toronto" Windmill now, you can obtain the self-oiling feature by interchanging the head and using your present wind. Most Toronto Windmills, too, can be made absolutely self-regulating in operation. The "Toronto" Tower will stand for a lifetime because it is the heaviest, strongest and best-braced one built for any windmill. See this new mill now—or get my booklet.

BRITISH COLUMBIA GROWERS ARE PROCESSING OWN FRUITS

Strawberries Being Put Up in Two-to-one Quota of Hatzic, Which Plan Can Accommodate 500 Tons—Peak Production Will be Between June 20 and 25 and Total Will Fall Short of Estimates.

(Farm & Home, Vancouver, June 14) No strawberries grown by members of the British Columbia Berry Growers Co-operative union have been sold to jam manufacturers at 7c a pound. None will be sold at that price, said Manager E. Doherty of the union, Saturday.

"We have equipped ourselves, and purchased a supply of sugar," he said, "and we are putting down our strawberries in the two to one process in our own cold storage plants."

The process is two parts of berries to one part of sugar. The co-operative plant at Hatzic cold processes the mixture and has a capacity for cold storage also of 500 tons.

Enquiries from Outside "In addition the union is processing and will store another 100 tons elsewhere," Mr. Doherty stated. "We have every hope of finding a more satisfactory market in the very near future, as we are receiving many enquiries from outside manufacturers of jams."

Supplies of strawberries have been shipped already both to the Vancouver market and Pacific market Monday.

Crop Overestimated If weather conditions are favorable at least one car load of strawberries each day will be shipped throughout the coming week. The peak of the season is expected to be reached by about June 20 to June 25. If fine sunny weather prevails until that peak period is reached growers will wear a happy smile, though it may be rather a tired one also.

From reports reaching the headquarters of the union in Vancouver it would appear that the strawberry crop has been overestimated. The crop will fall short of estimates owing to lack of pollination due to cold wet weather. In such climatic conditions the bees do not work.

Rhubarb is Moving A car load of rhubarb was shipped into Vancouver this week-end and placed in cold storage to supply the local market. It is expected to fully take care of local requirements for the next week or more. Growers are advised to cease picking rhubarb for the time, as strawberries have a pronounced call from consumers at present.

Strawberries were moving Saturday at fair prices from the growers' point of view—jobbers were paying wholesalers \$2.50 per crate. That figure is not quite as good as returns from the prairie market for B. C. berries.

"Rasps" Are Coming Granted favorable climatic conditions raspberries will be moving before the end of this month. That is an exceptionally early market movement for B. C. raspberries.

Gooseberries have advanced in price over the unsatisfactory offers prevailing from wholesalers until very recently. The increased return to growers is directly attributable, in large measure, to the organized merchandising methods of the union and associated organizations aiming to protect the growers.

SUCCESSFUL AT LAST IN SEARCH FOR HEALTH

Toronto Lady Agreeably Surprised By Splendid Results Obtained From Dreco.

Dreco is daily growing in popularity because of its certain action on the organs of digestion. It succeeds where many other remedies fail. The case of Mrs. Elizabeth Hammer, of 153 De Foe Street, Toronto, is typical in this respect.

"I constantly had a pain in my back from my kidneys and could hardly bend over without suffering," declared Mrs. Hammer. "My joints and muscles ached with rheumatism. My stomach and liver also troubled me quite a bit and I had dizzy spells and spots floating before my eyes. I was weak and my system was all run down and I most always felt tired out."

"Dreco has done more good for me than anything I have ever tried. The pain in my back is gone and I feel much better in every way. I now sleep well and am much stronger, so I am glad to recommend Dreco to help others."

No case of this kind is too severe or long standing for Dreco to help. Let its corrective properties, that come from nature's roots, herbs, bark and leaves, aid in restoring you to normal health and comfort. Dreco contains no mercury, potash or habit forming drugs and is enthusiastically recommended by a physician who tries it. It is an ideal tonic.

Dreco is being specially introduced in Grimsby by Leslie J. Farrell, and is sold by a good druggist everywhere.

OUTBREAK OF GRAPES LEAF HOPPERS

Grape Growers Are Its Appearance Pest is Making Its Badly Attacked Vines Are in Color. Concord Reddish in

Grape leaf hoppers appear in many vineyards throughout the Niagara district, and the probability is that, unless fruit growers take necessary precautions, grape crop will severely injure the nature of leaf. Last year the serious damage was very hopper injury to the infected, unapparent in heavily what was sprayed grapes, but rent was the probably not so apparent on bad damage to the fruit. They had failed to ripen propent, and consequently were poor looking having the cord grapes instead of, were reddish normal dark blue color, in appearance.

What steps should be taken to control the leaf hoppers? The first thing is to ascertain the berries. This can be done readily by jar the vineyard, and there throughout common. If the leaf hoppers Black Leaf 40 or sufficient supply of copper sulphate Nicotine Sulphate, ofms should be or (blue stone) and of 10 that when the dored immediately arrives, there will time for spraying materials as there be no shortage of May or make a was last season. A long rod is an short spray rod—a long in graperies, awkward thing to handle adapted for and a spray gun is not of the leaves, spraying the underside, the rod. Re- fit angle nozzles on the rods) at the move all the shoots (sub before spray- base of the vines shortly spraying and ing. This will simply destroy large numbers of eggs and n' within the leaves.

Time of Application: The spray should be applied before any of the first brood hoppers have acquired wings. The time about the end of most probably the second week in July. However, in order to have the application prop- erty timed, a warning notice will be sent out from this laboratory shortly before the spraying for the hopper should commence.

Method of Spraying: Direct the spray material upward, so that the underside of the leaves will be thoroughly drenched. Do not be afraid to use liberal quantities of the mixture. By liberal quantities we mean sufficient material to wet prac- tically all the underside of the foli- age—the exact amount required to do this may vary from 120 to over 200 gallons per acre, depending on the density of the foliage.

—William A. Ross, Dominion Entomological Laboratory, Vineland Station, Ont.

THIN YOUR PEACHES

Unbalanced production of fruit occurs frequently on nearly all kinds of tree fruits. In some years certain varieties or kinds will yield a very heavy crop while in the following year little or no fruit is produced. This irregularity of bearing is undesirable because it adversely affects both the market and the vitality of the trees. After the 1922 crop the vitality of some plum trees was so low that they were quite seriously injured and in some cases killed outright by the severe winter following.

Some of the factors that affect the setting of fruit such as moisture and temperature conditions are beyond the control of the orchardist but cultural practices such as tillage, pruning, spraying, fertilizers and thinning can be used at least to partly regulate the fruiting habit of the trees.

Experimental work with plums done at this Station in 1922 shows definitely that thinning is a valuable factor in getting annual crops and also exerts a beneficial effect on the health and vigor of the trees. Where thinning was done during the past summer, there is now a good crop but on trees which had a heavy set of fruit in 1922 and where no thinning was done there is very little fruit to be found. Thinning plums perhaps did not pay in 1922, even though all thinned fruit graded as select and unthinned fruit graded only as medium or less. Market conditions were too poor and there were too many poor grade plums. However, there is the effect of the vigor of the trees and on this point the crop which is much larger than noted, crop which has been as previously.

Thinning should be done shortly after the June drop. In the case of the pits hard work should be done when the fruit is small, before the fruit is too large. Thin sufficiently to four to five inches from touch, for peaches. Thinning should be done as a part is about right.

Miss Grace Walker, of Smithville, and Mrs. Jackson, of Toronto, are visiting at the home of Ald. H. D. Walker.

During the past ten days the biggest cut of roses ever made in the history of the plant of M. O'Neil & Sons, has been cut. The average has been fifteen thousand roses a day.

The Presbyterian Sunday School will hold their Annual Picnic on Thursday, July 5th, to Dundas Park. Special Radial car will leave Grimsby at 8:40 a.m.

Rumor already has it that Thos. J. Mahony, Conservative member-elect for South Wentworth, will be the Minister of Highways and Public Works in the Ferguson cabinet.

Miss Mildred Moore returned home on Sunday from a vacation trip to Cleveland. She was accompanied by her sister Elma, who has been residing in the Ohio city for the past nine months.

Kremenza Collar Buttons are guaranteed against discoloration or breakage from use. Bring in the damaged button and get a new one free of charge. Vernon Tuck sells them for 35c each.

An afternoon tea, under the auspices of the W. A. of S. Andrew's Church, will be held on Friday (June 29), from 4 to 7 p.m., at Mrs. Rutherford's. Nothing could be more refreshing than an hour or two spent on the beautiful lawn at this well-known historic old place.

While climbing in the manhole of one of the big filtering tanks at the pump house, on Wednesday last, Town Engineer Bromley lost his balance and fell to the bottom of the tank, dislocating his right shoulder and shaking him up badly.

An afternoon tea, under the auspices of the Woman's Auxiliary, of S. Andrew's Church, will be held on Mrs. Rutherford's beautiful old lawn, on Friday afternoon, June 29th. Tea, bread and butter, strawberries and cream and cake will be served from 4 to 7 p.m., for twenty-five cents.

There was a war in Swayzeville one day last week, with the result that Edw. Carpenter appeared before Magistrate Kidd, on Saturday morning, charged with common assault on one, Helen Hannigan. It cost Edward \$10 and costs for raising his hand to a woman.

Two young lads, "Ping" Hill and "Jack" McDonald were taken into custody last night charged with breaking into the store of J. F. Richardson & Son, on Monday night and looting the cash drawer of some thirty odd dollars. Nearly all the money was recovered, being found buried on the Rutherford property, in the rear of the Presbyterian Church.

LORD DURHAM'S REPORT

Q—What was Lord Durham's Report?

A—Lord Durham's Report, made to the Imperial Parliament in 1839 was based upon the rebellions or uprisings of Lower and Upper Canada in 1837-8 as a protest against existing political conditions and resulted in many reforms and the establishment of the United Parliaments of the two provinces under a Union Act.

Obituary

LATE FRANK HEWITT

Buffalo, N. Y., June 22—Funeral services for the late Frank E. Hewitt, aged 58, superintendent of the "Disappearing" Propeller Boat Company of North Tonawanda, N.Y., who died at his home, 151 Falconer street, North Tonawanda, after a brief illness with pneumonia, on June 18, were held yesterday afternoon from his late home here and interment was here in Elmawn Cemetery. The late Mr. Hewitt is survived by his wife and two daughters. He was a member of Grimsby Lodge, No. 7, A.F. & A.M. of Grimsby Ont., and Lodge of Perfection of Hamilton, Ontario, and of the Mystic Shrine of Detroit, Mich.

JOSEPH SIMMONS SECOR

After a long, lingering illness, borne with great fortitude, there passed away at Grimsby East, on Saturday, June 23rd 1923, Joseph Simmons Secor, beloved husband of Dora Durham, in his 63rd year.

The deceased was born in Scarborough township and came to Grimsby Centre about forty-three years ago. Three years later he married Dora Durham, daughter of the late W. B. Durham, and resided on the late Mr. Durham's farm, until eight years ago, when he moved to Grimsby and later to Grimsby East.

Deceased took an active part in politics and municipal affairs, being in the South Grimsby Council for eight years, two years of which he was reeve.

Left to mourn his loss, are his widow; one son, Herbert, now residing on the old homestead, and one daughter, Mrs. J. S. Mortimer, of Grimsby East; also three sisters and two brothers, Mrs. T. Walker, Mrs. W. R. Patterson, Mrs. A. Graham, all of Grimsby; Arthur G. of Calgary, and Milford, of Wansan, Wis.

The funeral took place from his late residence, on Tuesday, June 26th, 1923, at 2:30 p.m., to Queen's Lawn Cemetery. The pall-bearers were: W. C. Durham, G. L. Book, J. M. Durham, W. O'Connell, Jno. Erb and I. Plett. Rev. Mr. Ballard officiated, assisted by Rev. Mr. Currie and Rev. Mr. Dumas, of Smithville. The floral tributes testified to the high esteem in which deceased was held.

FLOWER BEDS
AT PUMP HOUSE

It is only a matter of a few weeks until the one real beauty spot of the whole town will be the park at the water works pumping station, on the lake shore at the foot of Elizabeth street.

The lawn and flower beds in front of the pump house are already a sight for sore eyes and there is still work to do on them. As soon as the work of installing the new filtration plant is finished the ground at the rear of the pump house will be sodded and more flower beds laid out. At the present times roses and geraniums are vying without one another for premier honors and the whole backed up with the green sward is a thing of real beauty. The pump house engineers are to be congratulated on their work and efforts to make this spot one that the visitors to the pump house, and they are many, can go away and talk about.

The bank on the west side of the road, in front of the pump house, has been sodded and on its face in letters eighteen inches square, appear the words, "Grimsbey Water Works". Engineers Dipper and Smith made the forms of these letters and then made the letters out of concrete and painted them white with enamel. They also made the word "Grimsbey" which we understand is to be placed in a prominent place on the Highway.

The three large filter tanks have been placed in position at the rear of the pump house and are now being connected up. As soon as the connections are made they will be filled with the four different kinds of special gravel and sand through which the water filters and will be ready for use.

As soon as the work on the filters is completed a new building to cover them will be built. This building will be of frame covered with wire lath and stucco. A steam heating system is also to be installed in the pump house and filter house.

SLATS' DIARY

By ROSS FARQUHAR

Friday—Po got mad at the clerk down to the store today. He went to by his self a new Straw hat and after he finely found 1 which looked fairly decent he handed it to the clerk and sed I geas this 1 will do. The clerk sed Well theya no use rapping it up you mite as well ware it rite away and leave fokes go a head and get there laff over with rite now. & laffed as he sed it.

Saturday—They was a man at are house today and Ant Emmy ast him where did he live and se sed at South Bend and Ant Emmy sed Why is South Bend a town I all ways that all the time it was a curve in the pike somewhere.

Sunday—Jakes ma woodent send to Sunday school today on acct.

DOMINION DAY

The ties of love for our country Are linking the East and the West The North and the South, and all between In a land that is Heaven blest, Where hope in the nation, founded On deeds of the present and past, Shall blazon with undimmed splendor For as long as the earth shall last.

LINCOLN ELECTS KEMP BY A MAJORITY OF 97

(Continued from Page One)

as a political party, Premier Drury and five of his cabinet going down in the maelstrom of ballots. One of the finest features of the election was the return to parliament, in London City, of Sir Adam Beck, by a huge majority, and the defeat in Toronto of Carmichael, the government representative on the Hydro Commission. Ontario needed Sir Adam, and needed him badly, and London citizens seeing the error of their vote of four years ago, returned him to his seat in a magnificent manner.

South Wentworth voters showed their wisdom at the polls by electing Tom Mahony by a substantial majority, and his many friends, throughout the Fruit Belt, are much elated over it. St. Catharines City was retrieved from the Labor ranks by an old Grimsby boy, E. C. Graves, whose majority ran up into four figures.

"BOBBY" FARRELL

(Continued from Page One)

In spite of the small vote polled in the district, the public was hungry for news of the county results and also from the province. The telephone in the Independent office rang incessantly for hours and they received the very best of service in spite of the elements and other confounding conditions. To the operators at the Bell Telephone Office the Independent is very grateful, for they certainly were on their job and handled the hundreds of calls over our two phones in excellent shape. The service they rendered was absolutely perfect.

When the final figures announcing Kemp's election were received the "Two Tons", Marshall and Allan, were in the Independent Office, and like the true sports that they are, they shook hands and both made short speeches to the big crowd of electors present.

THE C. P. R. FLEET

Q—What is the strength of the Canadian Pacific fleet?
A—The Canadian Pacific fleet now numbers over 60 steamers on the Great Lakes and rivers of Canada, while the Canadian Pacific Ocean Steamships have over 30 boats on the Atlantic and the Pacific, making, with the Railway, an all-the-world around route.

U. E. L. MIGRATIONS

Q—What was the extent of the United Empire Loyalists migration into Canada?
A—The migration into Canada of United Empire Loyalists began about 1784 and lasted for several years, numbering probably not less than 25,000, 10,000 of whom settled on the banks of the St. Lawrence.

CONGREGATIONAL CHURCH

Q—What is the strength of the Congregational Church?
A—The Congregational Church in Canada numbers 12,600 members and 31,000 under pastoral care. 100 pastoral charges and property value of \$2,294,000.

MUST HURRY UP ROAD WORK

(Continued from Page One)

\$1,000 be made to each High School in the County.
That the agricultural grant of \$500 be paid to Beamsville High School.

Finance

The report of the Finance Committee recommended: That Mr. Marquis' account for \$191.99 be paid.
That the auditors' report be adopted, and printed in the Minutes.

That a grant of \$50 be made to the Niagara Historical Society.

That the account re Lena Horton, from Niagara Falls General Hospital, be referred to the County Solicitor.

That regarding Mr. Boyle's account re Lena Horton, from Niagara Falls General Hospital be referred to the County Solicitor.

That regarding Mr. Boyle's accounts, upon advice of the County Solicitor, same cannot be paid, it not having been certified to by the Warden and County Attorney according to the Statutes.

An amendment that the County have all intersections on County roads up to the lot line in Beamsville and Port Dalhousie was lost, Councilors Wellington, Richardson and Trevelyan voting for the amendment.

Printing and Building

The Printing and Building Committee submitted the following recommendations:
That the purchasing of a safe for the jail be left to the chairman to procure.

That a typewriter be purchased for the use of the sheriff.

That the matter of securing information as to installation of an oil burner in the county buildings be left in the hands of the Printing and Building Committee to bring in a report.

A SUMMER CAMP FOR BOYS

The local churches, working through the Grimsby Boys' Work Board, are arranging to send a contingent of 'teen age boys to the Crescent Grove Camp, situated near Port Dover, to be held from July 16th, to the 24th.

The Camp is promoted by the Ontario Boys' Work Board, representing the Protestant Churches and the Y. M. C. A.

The Camp will be under an Executive second to none. The following are some of those who will be present during the camp to give the boys lead and instruction: The Rev. W. Williams, of Springfield; Mr. O. H. McDonald, Secy. Baptist Church of Ontario; Prof. J. W. Crow; an enthusiastic nature student. The Camp Director will be Mr. Fred Manning of Simcoe.

The site chosen is one of the most beautiful spots on the shore of Lake Erie. Crescent Bay is a perfectly safe place for bathing, and the swimming will be under a very competent teacher.

Fun and instruction will be blended together: Baseball, volley ball, competitions, aquatics, including life saving. Talks on birds, flowers, stars, then sing songs, stunts first aid, and Bible study and devotional talks. Not the least important part of a camp is the food, and this is receiving particular attention. The food will be of the best and a group of ladies have very kindly volunteered their services for this purpose. Note this, the noon meal will be cooked by the boys themselves in tent groups over camp fires! A boys' paradise indeed.

Boys wishing to go should apply to their own churches, who will make all arrangements for them. Transportation is being arranged for by the local executive and Alfred Fonger has been appointed Keyman for this district. Sunday, the 8th of July, will be the last day for entering.

The total cost of the 8 days will be the modest sum of \$6.75. For a shorter period \$1.10 per day. We wonder if the people of Grimsby can see any vision in the holding of this camp? The lasting impression it must make on the lad's life; the awakening of a new interest in the work amongst boys; the urgent importance of moulding the character of

the citizens to be; should so appeal to the citizens of Grimsby as to lead them to assist boys in going to the camp.

After the Camp then the real work begins and the local Board will not be satisfied with half measures, nor with late-warm support.

For further particulars, see the secretary, Douglas Wade, Grimsby.

WHYTE-CARPENTER

A pretty June wedding took place in St. John's church, Winona, on Wednesday afternoon when Rev. H. A. West united in marriage Alma Kathleen, only daughter of Mr. and Mrs. C. W. F. Carpenter, Grimsby, to Mr. Kenneth E. Whyte, son of Mr. and Mrs. George C. Whyte, of Grimsby.

The church was artistically decorated by the choir members with pink and white peonies, the guest pews being tied with white satin ribbon and orange blossoms. Mr. Harry C.

Campbell played the wedding march and during the signing of the register the choir sang "Oh, Perfect Love."

The solo part being taken by Miss Florence Mackay.

The bride was given away by her father, and looked charming in a quaint costume of white silk net with graduated widths of satin ribbon. She carried a shower bouquet of Columbia roses with streamers of white tulle. Forbes, of Tilbury, as matron of honor, who wore a dainty costume of printed crepe de chine made in the same quaint Quaker style as was the bride's gown. She carried a shower of long-spurred white aquilegia, pink pyrethrum and white tulle. Mr. Hugh White was best man and Mr. George Nelles was usher. After the ceremony a reception was held at Pinehurst, where the spacious rooms were transformed into a bower of flowers.

The bride and groom later left on a motor trip. The bride's going-

away costume was a three-piece suit of beige tricotine, combined with Paisley crepe de chine in lettuce tones. She wore a French hat in the same shade.

HIGH SCHOOL REUNION

A reunion of the pupils of the G. H. S. years of 1910 to 1915, will be held at Grimsby East, Saturday, Aug. 4th. A strong effort is being made to bring all the old school chums of those years together again and already a great number have signified their intention of being present. Sports, a few speeches and a good feed with a dance afterwards will be the features. Miss Mary Blakesley is president of the committee in charge, while Len Bromley is secretary.

News and Views of SPORT

GRIMSBY LOSES FIRST GAME

At St. Catharines, on Saturday afternoon, Grimsby ball team lost their first league game of the season when after a gruelling nine innings the St. Catharines aggregation triumphed over them by a score of 6-5.

Freddie Strong was in the box for Grimsby with Atwell doing the receiving. Strong pitched a wonderful game, a winning game and sure deserved a win, but it was not to be. The Peach Kings were playing big league ball at all points but the breaks of the game were with the home team.

The local lads report the St. Catharines diamond to be a very poor one, which hurt their chances of pulling out a victory.

This week-end is going to be a hard

one for the team as on Saturday they play Merriton in Merriton and come right back against Beamsville in Beamsville on the holiday afternoon. This second game promises to be a sizzler as "Pud" Reid has the Beamsville team travelling at top speed now and they will take a lot of beating.

So far, Grimsby has won three games, lost one and tied one and they are tie with Merriton for the group leadership. A double win over the week-end will practically give the local lads the group championship without the necessity of playing off the tie game with St. Catharines.

THE CANADIENS ARE COMING

Good news to hockey fans was received last week, when the signed contracts were returned to Leslie J. Farrell from Leo Dandurand, of Montreal, whereby Leo agrees that the famous Montreal and Grimsby Canadiens will again do their early practicing in Grimsby Arena.

Under the contract, Farrell agrees to have ice in the Arena by November 15th so that Dandurand's Dandies can have three full weeks of practice before opening the National Hockey League season.

The return of the Canadiens will be welcomed by all hockey fans in this district, as the boys from the West City certainly made a lot of friends in the Fruit Belt during their stay here last year.

ELECTRIC GENERATORS

Q—It is claimed that Canada has the largest water-wheel driven generators in the world. If so, where?

A—Canada has the largest water-wheel driven generators in the world at Queenston as part of the power plant of the Chippewa-Queenston Hydro-Electric plant. They are rated at 45,000 h. p. a., is driven by a water wheel of 55,000 horse power capacity, runs at a speed of 187 r. p. m. and supply current at 12,000 volts.

CLONIE TAIT, CANADIAN LIGHTWEIGHT.

The Canadian boxer has offered Henry Leonard \$25,000 to meet him at the lightweight limit.

MODERN GOLF

By W. J. Frank Thompson

NOTED CANADIAN GOLFERS

No. 10 EASE VS. EFFORT

Very few players can associate ease of effort with a long ball. They feel that only a most violent effort will produce a long drive. This is all wrong. Occasionally the beginner is told to hit the ball easily and sometimes he is surprised to find the ball has gone much farther than he intended it to go. If he were to pause and ponder the cause of such distance. Invariably he would find it was because he allowed his muscles to remain flexible on the back swing. Doing things comfortably is the key-note of the whole swing. It is what gives results, because the power is being applied properly.

The difference between good and poor players is largely one of flexibility. Usually the beginner stands in front of the ball with every muscle set. This only invites disaster. The moment one has to brace his muscles he is certainly drifting away from the proper method. Comfort should be the check on every style of play.

Must Be Bold

I hope I shall not be understood as advocating a "dolling" game. Far from it. One must be bold and courageous if he would win matches. Hard hitting is to be encouraged. A spared shot is one of the hardest in the game to play accurately. But the added effort should come at the right time. Most players when they wish to drive a long ball grip the club tightly and put the effort in too soon, usually somewhere in the back swing. As soon as the muscles become tense they do not work smoothly, and the reason why to many swings appear jerky is because the player has put on the force too soon which is oftentimes before the back swing is completed.

A good example of this is seen in playing into the wind. More foolish shots take place into the wind than with it and the reason is that the player feels he must make a greater effort. It would be wise counsel to try to hit more accurately. When we put in more effort we usually hit too soon and "hitting too soon" is one of the inherent dangers of the game.

The beginner uses up as much energy and more than the expert, but most of it is dissipated maintaining balance, whereas the latter gets most of it on the ball.

Muscles Must Be Relaxed

In playing into the wind or in trying for greater distances at any particular hole, the player should be sure that the muscles are relaxed. The back swing should be made smoothly and easily, and the effort should not be put into the shot until the down

swing is well on its way. Hold back and "take it easy" on the back swing is one of the few tips in golf that is worth remembering. Hit hard and fast on the down swing for the ball will not go far unless the swing is fast.

One should guard against straddling in golf, for the reason that it tenses the leg and hip muscles and makes equilibrium harder to maintain. Curiously one has the sensation of greater strength when the legs are wide and tensed, but considering the work required of the leg muscles in the up swing the sensation is a fallacious one, and not to be followed. Sensations are notoriously unreliable. Sometimes pain is felt in the orbital centre which has its origin in some of the muscles of the leg. It is in some of the muscles of the leg that the foot used to be.

The Arm and the Club

Confusion is continually cropping out in golf. At the present time most golfers try to obtain a straight left arm. We have been taught from time immemorial that the left arm and the club shaft are to be conceived as one continuous part. This is quite right. Where the error comes in is in consciously straightening the left arm from the start, whereas it is a consequence of the swing. This straightening occurs after the swing has begun, and not before. One does not straighten out the arm deliberately; it is straightened out by the club's resistance as the body turns in the swing. In the golf swing the club is the very last thing to start moving. The first movements start at the left ankle, up through the leg and hip muscles which causes the shoulders and body to turn; the hands move last. The inertia of the club must be overcome and the turn of the shoulders and left arm cause a strain at the wrist joint. The hands are dragged, so to speak, for a few inches and then the club head follows. The left arm and club do not get in a straight line until the club has gone some distance. When the club gets

Men who make this test Find quicker, easier shaving

We want you to test a shaving cream which, millions of men will tell you, gives quicker, easier shaves. It costs no 15 months' time—150 experiments—to perfect it.

But the result was a cream in 5 distinct ways better: It softens the toughest beard in one minute—without rubbing in. Multiplies itself 250 times in rich lather.

THE PALMOLIVE COMPANY OF CANADA, Limited
Montreal, Quebec Toronto, Ontario Winnipeg, Man.

PALMOLIVE
SHAVING CREAM

Lather will last 10 minutes on the face. Strong bubbles hold hairs erect—for easier cutting. Skin is left soft and smoothed by lotion-like effect of palm and olive oils.

IF PALMOLIVE SHAVING CREAM does all this you will want to know it. It doesn't—well, we are the experts. Mail coupon for free tube today.

10 SHAVES FREE

The Palmolive Company of Canada, Limited,
Dept. D-451 Toronto, Ont.

going its own momentum causes it quickly to become the leading member. But as pointed out before, the left arm becoming straight, is only an incidental of the swing. When one consciously makes the left arm straight there is the greatest danger of causing the swing to lose its flexibility and whenever this happens it means a loss of distance.

Flexibility Desired

Rigidity is the negation of power. In playing approach shots or spoon shots, where accuracy and not distance is the great factor the swing certainly becomes more compact. But where distance is desired the more flexibility one can get into the swing the better. This is why one who is anxious for length should be very careful about adopting blindly the straight left arm.

The golf swing when effective is performed naturally. When one attempts to consciously build it up or develop it, an element of effort is introduced which invariably destroys the whole thing.

(The End).

THE TWIN CITIES

Q—What and where are the Twin Cities?

A—The Twin Cities in Canada are Port Arthur and Fort William at the head of Lake Superior. They have over 20 elevators with a grain capacity of over 50,000,000 bushels.

Q—When was Vancouver destroyed by fire?

A—Vancouver was destroyed by fire on June 13, 1886, when only four houses were left standing. Now it is a city of 116,000 per last census.

SOUTH AFRICAN WAR

Q—When did Canada send her first contingent to the South African War?

A—Canada sent her first one thousand men to the South African War in 1900.

and men to the South African War in 1900, sailing on the Sardinian from Quebec on October 20 with 37 officers and 1224 men. Second contingent sailed in 1900 including Strathcona's Horse.

SALVATION ARMY

Q—What is the strength of the Salvation Army in Canada?

A—The Salvation Army strength was, in 1922: Canada East, 93 staff and 709 field officers; 124 cadets in training; 121 outposts; 280 corps; 43 homes and camps; 69 day schools. Canada West: 45 field and staff officers; 125 corps and circles; 34 societies and outposts; 25 social institutions and one school.

ARCTIC CANADA

Q—Who made the first voyage to Arctic Canada? and when?

A—Martin Probst made the first voyage of discovery to Arctic Canada in 1576-7-8.

Now Comes A Greater
Overland
Model 91

With Long Lines, High Hood, Low Seats

NO other car anywhere near Overland's price, offers the manifold advantages of this new model.

It is outstanding in appearance and appointments. Its body lines are long and graceful, with high hood and imposing radiator. Drum head-lights set off to advantage the full-crowned fenders—fenders such as you find only in higher-priced cars. Its body is all-steel, with baked-enamel finish.

Low seats add to the buoyant riding once assured by its Triple Springs, an exclusive Overland feature.

Important mechanical features to be found in no other low-priced car contribute to the dependability of the new 91, as for instance, the new floating type rear axle with shaft of special nickel steel and removable without tearing apart the housing.

A Rear Axle Shaft 27% heavier than in any other car in the Overland price or weight class.

Parchment or Silk Shades?

"Are parchment lamp shades no longer in vogue?" is a question often asked us. There seems to be a tendency for the general public to consider parchment shades as passé. When any vogue has held popularity for a length of time a tendency to discard it crops up from time to time. A certain percentage of homemakers decorate their rooms not according to their individual taste, but by following the dictates of the dearest fashion.

The danger in this plan is that many times they are guided by those people who for selfish reasons advocate their using certain articles. The shops which advocate the use of silk shades broadcast the impression that those only are correct. The shops in favor of paper ones take up their cause. Confusion in the minds of the public is the result. Its elimination can be gained only by exercising one's ability to make independent decisions.

There is no definite answer to the problem. In the fact that the use of parchment shades was abandoned, as are many new fashions, lies the reason for the wane of their popularity. They are, however, suited to many interiors, as are also silk ones. In to-day's sketch the artist has shown a beautiful lamp with a silk shade.

shade. Silk is better suited to such surroundings than is paper.

Golf Lures Milady to the Links, and She Wears a Knitted Jacket.

It seems that the canvas... sweaters. The same shirt, provided it be of neutral tone, permits of endless costume effects by the simple change of sweater.

Five to ten balls of lightweight yarn, lustre Iceland, silver glow, Corinthian, with angora for trimming, at a very small cost, afford the material for the sweater. Two days of knitting at odd moments and a sweater is completed.

The designs and outlines in vogue are loose, and the amount of yarn and the time required to make are much less than a few years ago.

This is an angora sweater. No sweater is complete without its bit of angora trim. The smart, well dressed girl at the seashore and in all her sweet hours will look a bit like a fluffy chick with her sweater, scarf, hand knit dress and caps finished with angora collar and cuffs, and often the pattern being part angora and part of the other worsted yarns, such as silver glow, Corinthian, Iceland or wonder glow. Angora is being dyed all colors. Garments with self-toned angora trim are beautiful and fluffy and feminine, as well as decidedly stylish and smart.

15 tablespoons white sugar. Chop the vegetables up fine, mix with other ingredients and boil 3 1/2 hours.

Chow Chow—One gallon vinegar, 5 large cauliflower, 4 quarts small cucumbers, 3 quarts small onions, 2 green peppers, 1/2 pound mustard, 1 ounce turmeric, 1 cup flour, 3 cups sugar. Leave cucumbers, onions and cauliflower in brine for 2 hours. Boil cauliflower and onions in the vinegar before adding flour, mustard and cucumbers.

Ripe Cucumber Pickles—Cut up 1 quart of ripe cucumbers, 1 quart of onions, 1 quart of ripe tomatoes; add 1 quart of vinegar. Boil all together until tender. Add 1/2 scant teaspoon of cayenne, 1 heaping teaspoon salt, 1 1/2 cups granulated sugar. Add to this 1 tablespoon of mustard, 1 small teaspoon turmeric, 2 tablespoons flour mixed smooth with a little cold vinegar.

Mustard Pickle—Two quarts cucumbers, 2 quarts cauliflower, 2 quarts onions, 2 quarts green tomatoes, salt them over night, then drain. Add 1 gallon vinegar, 1/2 pound mustard, 1 ounce turmeric, 2 cups brown sugar, 1/2 an ounce small red peppers, 1/2 cup flour. Boil all together and pour over the pickles.

Chutney Sauce—A dozen sour apples (grated), a dozen ripe tomatoes, 1/2 pound brown sugar, 1/2 pound mustard, 1/2 pound onions chopped fine, 3 pints vinegar, 1 pound seeded raisins (chopped), 1 ounce of whole cloves. Boil all the ingredients until they are cooked to a pulp, and put the sauce through a colander.

Pickled Beans—Put 1 peck of butter beans in salted vinegar. Let come to

a boil 3 pints of vinegar and 2 1/2 pounds sugar. Have mixed smooth with a little cold vinegar, 1 cup of flour, 1 cup of mustard, 1 dessertspoon turmeric. Pour this mixture into the hot vinegar. Boil 5 minutes; add beans and boil gently for 3 minutes.

V—Comfy is the Jacquette.

One's wardrobe is really not complete unless it contains one of these Jacquettes—no matter of what material it is fashioned. Mildly will find them extremely comfortable and useful as they can be worn on very many occasions during the summer season. Here is one smartly limited in blue and black.

FOR THE QUIET DRESSER.

Charming in its simplicity is this shaded pink chiffon evening gown finished off with a huge bow and shaded moire ribbon.

CANNED FRUITS AND VEGETABLES ARE NOW STANDARDIZED

Housekeepers run practically no risk of getting a poor quality of canned fruits or vegetables if they will be careful to order by quality grade. All canned goods put up in the larger factories must conform to legal standards, and these are shown on the label of the can. The system of standardizing canned fruits and vegetables is explained in the May-June number of the Agricultural Gazette by C. S. McGillivray, the Chief Canning Inspector of the Department of Agriculture at Ottawa.

The four legal standards of quality for fruits and vegetables are: "Fancy Quality," "Choice Quality," "Standard Quality," and "Second Quality."

In addition to general standards for vegetables, specific grades have been established for canned peas. These are as follows: Size No. 1, Size No. 2, Size No. 3 and Size No. 4. The size is determined by the opening in the sieve through which the green peas will pass.

Canned fruits are graded for quality and syrup. In grading for syrup, the terms "Heavy Syrup," "Light Syrup," and "Without Syrup" are employed. If the packer so desires, he may substitute the words "Packed in Syrup" for "per cent. Sugar," (stating the percentage of sugar in the syrup).

The terms denoting quality and grade must appear upon the main portion of the label in plain type of a size not less than 3/8 of an inch in height. Thus, in the case of peas, the label must indicate the quality and size of the peas contained in the can, thus—"Fancy Quality, Size No. 1." In the case of fruit, it must indicate the quality of the article as well as the consistency of the syrup so far as sugar content is concerned, thus—"Fancy Quality—Heavy Syrup."

The declaration of net weight on certain sizes of containers is not required, as these sizes have been standardized. These sizes are known as Size 1's, 1 1/2's, 2's, 2 1/2's, 3's, and 10's. The minimum net weight of both liquid and solids as packed is defined for each of these sizes. Sizes not standardized must show on the label the net weight and the drained weight.

Issued by the Director of Publicity, Dominion Department of Agriculture, Ottawa, June 13, 1923.

JUNE ATMOSPHERE IN JANUARY

Our booklet, "Live Air Heating," shows how your home can be heated with live, healthy, sterilized air—at the smallest possible cost. It shows you how heat acts; how we get the benefit of it; how to ventilate your house; how to dispel the odors of cooking and smoking; why moist air is best; why a heating system is often the ally of disease. It will show how to keep the air in your home just like the outdoor atmosphere of June. Send direct to the factory for your free copy to-day.
